

# CANELA

## a conversion adaptable to different models of vans starting from €30,000\*

At Estudio Toba, we believe that life on the road shouldn't be a complicated privilege, but a real, attainable, and beautiful possibility.

After weeks of planning, design, and reflection, Canela was born: an affordable, thoughtfully designed, and ultra-functional conversion model, created so you can hit the road as soon as possible with everything you need to experience van life to the fullest.

it's a fully defined design concept, with an optimized layout and specifications, ready for production and adaptable to different van models and sizes:

### Canela preserves everything that defines our custom vans:

- A minimalist, natural aesthetic
- Textures that speak for themselves
- Spaces designed with intention and awareness
- Furniture created to be both beautiful and functional
- A consistent harmony with the surrounding nature
- Every detail has been carefully considered so the space feels balanced, warm, and practical

Unlike our 100% custom conversions, Canela is based on a design that's already fully resolved. This allows us to optimize production times!

### CUSTOMIZABLE

We offer the possibility to customise some elements like for example the kitchen tiles the upholstery tones, adding one more roof window, or choosing between slide out or fixed bed!
